

**Welcome to The etoolkit Series™:
Create an Economic Development Profile
of Your Community!**

The Internet is a critical tool in today's global society. The first product in **The etoolkit Series™** is designed to provide elected officials a step-by-step guide to creating an economic development profile of their communities through use of the Internet to concentrate and filter usable data. This toolkit will assist elected officials and their staffs in planning and creating a template of all the data needed to compile a comprehensive community economic profile. Such profiles are useful in attracting business and industry and applying for state and federal funding.

This toolkit is divided into multiple sections, each of which offers a description of the web site and a step-by-step procedure to find necessary information to create a community profile. The toolkit helps users more effectively and efficiently process available data.

To order the toolkit, simply complete and submit the order form provided below. Order forms may be submitted by phone, fax, or mail. **The etoolkit Series™** is available on CD-ROM for \$29.95 (plus tax and \$2.00 shipping and handling). Once your order is received and processed, the JUSC will send confirmation via email.

More products from **The etoolkit Series™** will be available soon.
